There are two major influences behind this book. The first is the work of John Sinclair and his COBUILD research team over the last twenty-five years. This research is changing the way language is viewed, in particular the relationship between lexis and grammar. One outcome of the COBUILD research is the work on pattern grammar by Gill Francis, Susan Hunston and Elizabeth Manning which features heavily in Chapter 7.

The second major influence is the work of Michael Halliday. The whole view of language as a meaning system, which informs this book, comes from Halliday. I have attempted to describe language as a functional system, and this again derives from Halliday. In addition to this general influence the detail of very much of the description offered here is based closely on Halliday's work. Michael generously offered to read and comment on a near final version of the book. Most of his comments have been incorporated, although we still differ on the general approach in Chapter 5.

I owe a great debt to colleagues with whom I worked for ten very happy years at the Centre for English Language Studies at Birmingham University: Chris Kennedy, Susan Hunston, Terry Shortall, Murray Knowles, Corony Edwards, Bob Holland, and Carmen Caldas-Coulthard. Talks with these colleagues over the years have helped me in all kinds of ways. I am also grateful for help and insights over the years from two highly valued colleagues, and friends for many years, Malcolm Coulthard and the late David Brazil.

I would like to thank Jane Willis for reading and commenting on developing versions of the book. I have benefited from long discussions which have helped me to clarify and develop my thinking, and without Jane's help the book would certainly have been much less reader friendly than it is. Indeed, without her the book might not have been written at all.
