

Grammar worksheet: Numbers and colours

Trace and say the numbers. Then trace and count.

Unit Hello! Grammar: Guidelines for parents and guardians

Point to the numbers and practise them with your child. Give the child red, green, blue, yellow, orange and purple crayons. Point to each classroom item in the worksheet and encourage your child to count them with you. Ask about the colour of each one. He/She colours the items, each in a different colour. The child then traces the dotted numbers on the second half of the worksheet.
