

INSPIRE CURIOSITY AND DEVELOP STUDENTS' LIFELONG READING AND CRITICAL THINKING SKILLS

Mummies, Blizzards, Sharks, and Sports: with 96 readers to choose from, the *Cambridge Discovery Education™ Interactive Readers* will spark your students' curiosity, whatever their interests and language level.

High-interest topics, thought-provoking interactive activities, and captivating Discovery Education™ video combine to provide a one-of-a-kind learning experience for teens. Your students will enjoy choosing from a wide range of subjects – in 8 progressive levels from A1 to B2+ – allowing them to explore topics related to those covered in *Eyes Open* at greater depth.

Research confirms that by establishing good reading habits and a positive reading experience early on, students at this age will be set on the path to becoming lifelong readers. In other words, when students are given the opportunity to pick up and read something out of interest or curiosity, they will be more inclined to continue to do so, whether in or out of school. And, because of the wide range of topics at every level, the *Cambridge Discovery Education™ Interactive Readers* are ideal for mixed-ability classes – especially for students seeking to stretch to higher levels of reading proficiency.

Access Anywhere: Online or Offline

With the Cambridge Learning Management System, your students will have online access to the complete reader experience: the high-interest content, reading and critical thinking activities, interactive comprehension and vocabulary activities, and integrated Video Quests. And through the online grade book, you'll be able to track students' progress, create forums for discussion, and post assignments from your computer. Would your students rather use their tablets or smartphones? The *Cambridge Discovery Education™ Interactive Readers* apps, available through the Apple App Store® or Google Play®, allow your students to enjoy the readers anytime, anywhere.

Select your Interactive Readers today. Use this chart to help you choose which readers to use with each level of *Eyes Open*.
