

## TIPS FOR PROBLEMS

### Before You Write

Read the tips. How are they all organized? Check (✓) the correct outline.

#### PRESERVING OUR ENVIRONMENT

- Too many cars are being used. As a consequence, cities are becoming more polluted. One thing to do about this is to walk or ride a bike when traveling short distances. Another thing to do is to use public transportation when traveling long distances.
- Many rivers have been contaminated. As a result, many species of fish are being destroyed. The best way to solve this problem is to keep industrial waste out of rivers.
- People use a lot more water than they need. Because of this, our drinking water reserves have been depleted. The best way to stop this from happening is to use less water.

### Your First Draft

**A** Think of three environmental or social problems. Complete the chart.

Problem	Result	Solution

**B** Write a tip about each problem. Use the information in your chart and the Preserving Our Environment tips as a model.

**C PAIR WORK** Read your partner's tips. Write answers to these questions.

1. Is each tip about a different problem?
2. Does each tip give a clear result and solution?
3. Can you suggest any improvements to the content or grammar?

### Your Second Draft

Use your partner's answers to revise your tips.
