

**Online data sets to accompany Madrigal, *Statistics for Anthropology* (2<sup>nd</sup> edition)**

The data sets are provided in MS Excel format. Some of them have a short word file with the same name, which explains the variables, the project and the type of research which could be done with the data set. Not all the data sets are accompanied by such a word file. If the data set is explained within the book, then no word document is needed to explain it.
