

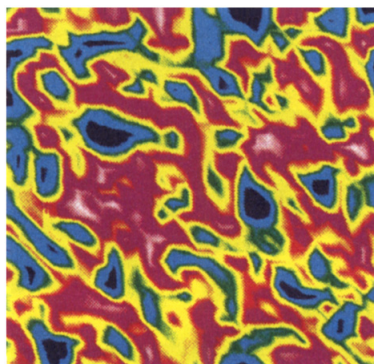

Plate 1 Color contours of instantaneous streamwise velocity along the span, on a horizontal plane, and on a vertical plane downstream of the step [ $Re = 8,888$ ] (see Chapter 8).

Plate 2 Plot of subgrid product concentration contours for the pseudoincompressible case at  $t^* = 0.549$  (see Chapter 15).

Plate 3 Plot of subgrid unmixedness contours for the pseudoincompressible case at  $t^* = 0.549$  (see Chapter 15).

A colour version of these plates is available for download from
