

Annotated X-ray Images

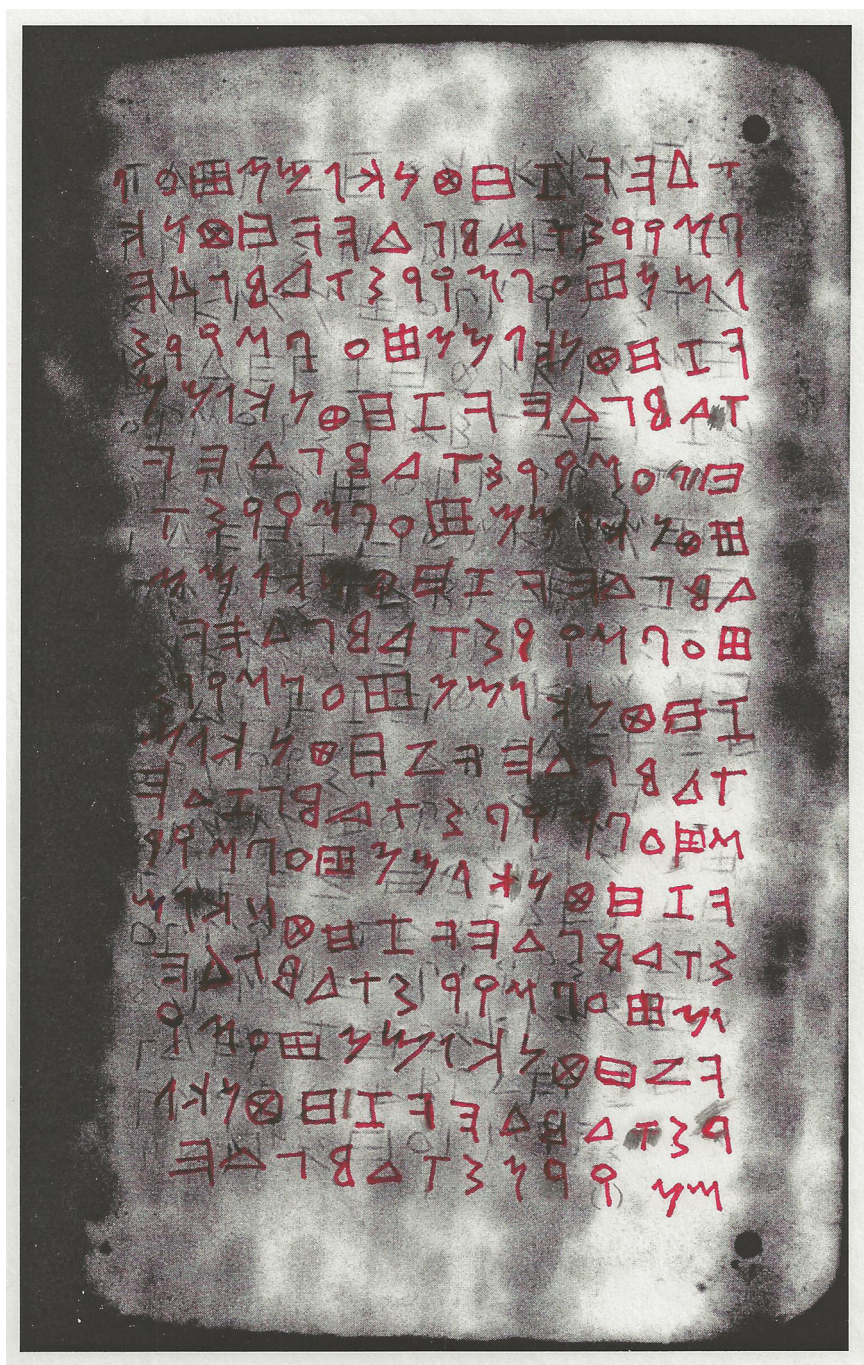

w-1. Hand-annotated X-radiograph of plaque face W-1. X-ray courtesy of Professor David A. Scott; annotations produced by Woodard at the Max-Planck-Institut für evolutionäre Anthropologie in Leipzig. Woodard subsequently checked each annotated letter against the original X-ray image to produce the narrow transcriptions that appear in Chapter 2.

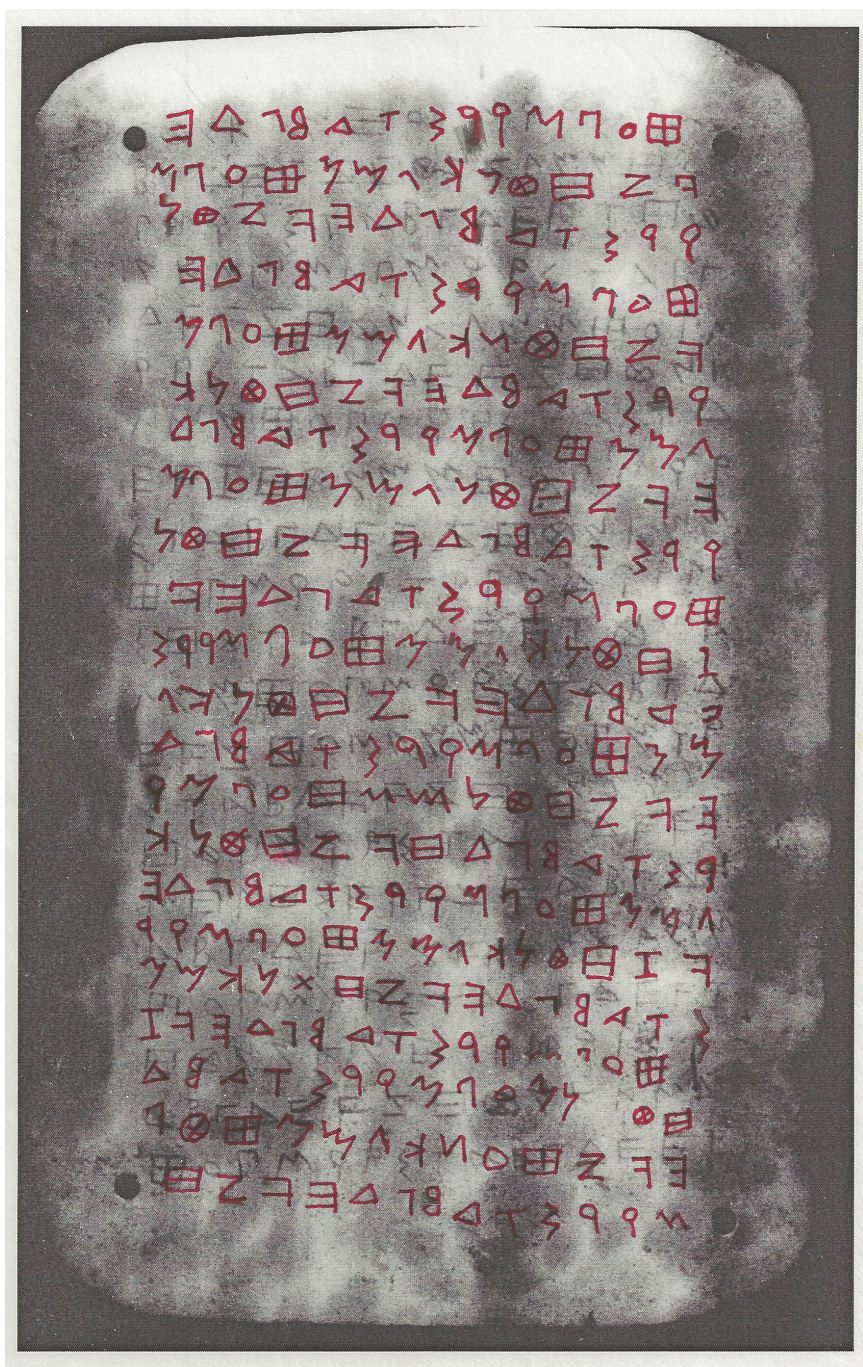

w-2. Hand-annotated X-radiograph of plaque face W-2. X-ray courtesy of Professor David A. Scott; annotations were produced by Woodard at the Max-Planck-Institut für evolutionäre Anthropologie in Leipzig. Woodard subsequently checked each annotated letter against the original X-ray image to produce the narrow transcriptions that appear in Chapter 2.

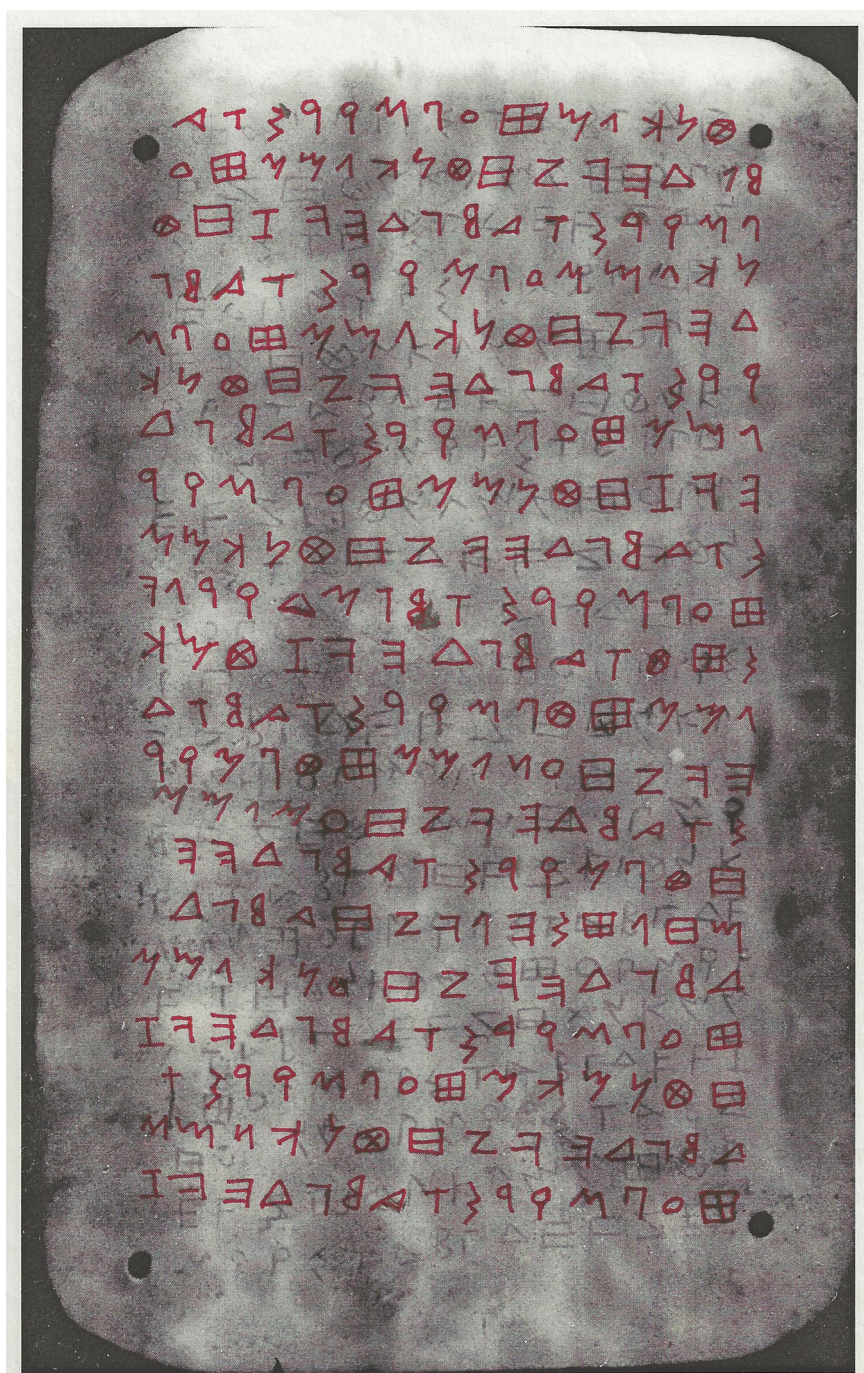

MS 1-1. Hand-annotated X-radiograph of plaque face MS 1-1. X-ray courtesy of Professor David A. Scott; annotations were produced by Woodard at the Max-Planck-Institut für evolutionäre Anthropologie in Leipzig. Woodard subsequently checked each annotated letter against the original X-ray image to produce the narrow transcriptions that appear in Chapter 2.

MS 1-2. Hand-annotated X-radiograph of plaque face MS 1-2. X-ray courtesy of Professor David A. Scott; annotations were produced by Woodard at the Max-Planck-Institut für evolutionäre Anthropologie in Leipzig. Woodard subsequently checked each annotated letter against the original X-ray image to produce the narrow transcriptions that appear in Chapter 2.

MS 2-1. Hand-annotated X-radiograph of plaque face MS 2-1. X-ray courtesy of Professor David A. Scott; annotations were produced by Woodard at the Max-Planck-Institut für evolutionäre Anthropologie in Leipzig. Woodard subsequently checked each annotated letter against the original X-radiograph to produce the narrow transcriptions that appear in Chapter 2.

MS 2-2. Hand-annotated X-radiograph of plaque-face MS 2-2. X-ray courtesy of Professor David A. Scott; annotations were produced by Woodard at the Max-Planck-Institut für evolutionäre Anthropologie in Leipzig. Woodard subsequently checked each annotated letter against the original X-ray image to produce the narrow transcriptions that appear in Chapter 2.
