

A

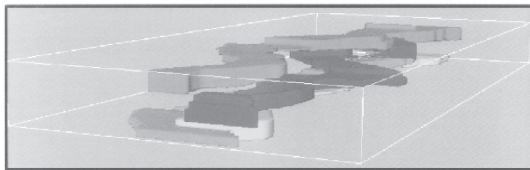

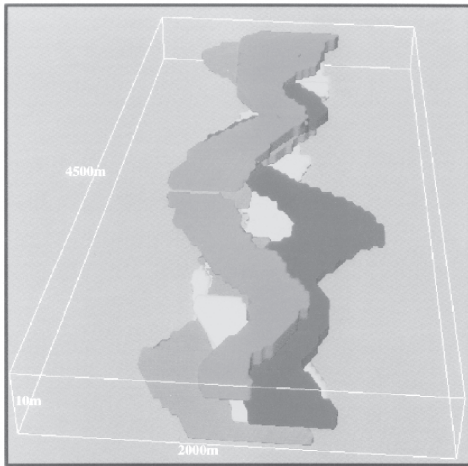

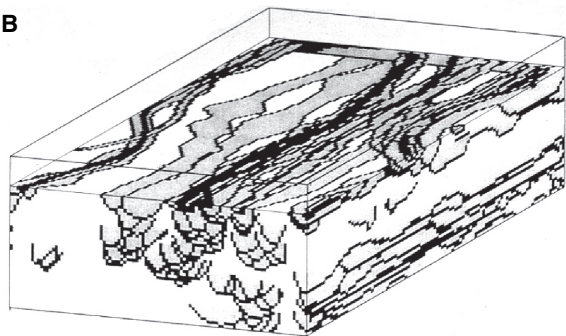

FIGURE 13.47. Object models for channel belts from Tyler *et al.* (1994) (A) and Deutsch and Wang (1996) (B). Both representations are unrealistic because real channel belts are composed of the deposits of channel bars and channel fills. AAPG © 1994 reprinted by permission of the AAPG, whose permission is required for further use. (C) A more realistic representation of objects (plans and cross sections of channel bars and adjacent channel fills) that must be distributed within channel belts. From Bridge (2006).
