

**ERRATA** in ‘Phytoplankton Pigments: Characterisation, Chemotaxonomy and Applications in Oceanography’

Page

250, equation 5A.6, left hand side term, the tilde above the letter  $C$  should be removed:  $\tilde{C}_{P_i} \rightarrow C_{P_i}$

251, equations 5A.7, 5A.8 and 5A.9, left hand side terms, the tilde above the letter  $C$  should be removed:  $\tilde{C}_{P_i} \rightarrow C_{P_i}$

273, bottom of Table 6.2g. Diatoms: Example  $\rightarrow$  Examples and *Rhizoselenia*  $\rightarrow$  *Rhizosolenia*

612, line 17: occurs in toxic conditions  $\rightarrow$  occurs in oxic conditions

705, absorption coefficient in pyridine is incorrect: 398  $\rightarrow$  401

721, reference for spectrum and absorption coefficient in hexane is incorrect (see Eugster and Karrer 1955): [57]  $\rightarrow$  [56]

723, absorption coefficient in hexane is incorrect: 276  $\rightarrow$  272

745, reference for spectrum and absorption coefficient in hexane is incorrect (see Zscheile et al. 1942): [180]  $\rightarrow$  [182]
