Design and Analysis of Long-term Ecological Monitoring Studies

Online Supplements: File Index

Chapter	Supplement	Title	File	Length (pages)
5	Supplement 5.1	R code for GRS sampling	Supplement_5.1.pdf	3
7	Supplement 7.1	Introduction to Chapter 7 supplements	Supplement_7.1.docx	2
	Supplement 7.2	Metadata underlying data used in the Chapter 7 examples	Supplement_7.2.pdf	12
	Supplement 7.3	Variable names and brief variable descriptions for data used in Chapter 7	Supplement_7.3.pdf	3
	Supplement 7.4	Original data set from which data were extracted for analysis in Chapter 7	Supplement_7.4.html	n/a
	Supplement 7.5	Data analyzed for Chapter 7	Supplement_7.5.html	n/a
	Supplement 7.6	SAS computations: Using a statistical model having only one slope	Supplement_7.6.pdf	6
	Supplement 7.7	SAS computations: Using a statistical model having as many slopes as sites with observations in multiple years	Supplement_7.7.pdf	7
	Supplement 7.8	R commands to compute the local estimate of variance	Supplement_7.8.pdf	2
	Supplement 7.9	SAS output for the one-slope model	Supplement_7.9.pdf	383
	Supplement 7.10	SAS output for the many-slopes model	Supplement_7.10.pdf	400
9	Supplement 9.1	SAS commands for evaluations summarized in Tables 9.1 and 9.2	Supplement_9.1.pdf	5
	Supplement 9.2	SAS commands for evaluations summarized in Table 9.3 (MQL1, PQL1, RPQL1, and Laplace estimation)	Supplement_9.2.pdf	6
	Supplement 9.3	R/WinBUGS code for evaluations summarized in Table 9.3 (MCMC estimation)	Supplement_9.3.pdf	3

Chapter	Supplement	Title	File	Length (pages)
	Supplement 9.4	Estimating variance components and variance partition components on the probability scale for binary/binomial outcomes	Supplement_9.4.pdf	4
	Supplement 9.5	SAS commands for evaluations summarized in Tables 9.4-9.5	Supplement_9.5.pdf	6
	Supplement 9.6	Estimating variance components and variance partition components on the probability scale for binary/binomial outcomes using the "differencing" approach	Supplement_9.6.pdf	4
	Supplement 9.7	SAS commands for evaluations summarized in Table 9.6	Supplement_9.7.pdf	7
12	Supplement 12.1	Fitting the Bayesian change point models in JAGS and R	Supplement_12.1.pdf	7
	Supplement 12.2	R code for simulations presented in Chapter 12	Supplement_12.2.pdf	2
15	Supplement 15.1	Mplus output for final example model presented in Chapter 15, as summarized in Table 15.6	Supplement_15.1.pdf	9
	Supplement 15.2	Data used for the extended ecological example in Chapter 15	Supplement_15.2.docx	5
