
File format:

Column 1 = Number

Column 2 = Feature (S=Seamount, Sp seamount in French Polynesia, Spm = seamount in Magellans, D = river Delta, T = Trench-outer rise, R = mid-ocean ridge, F = fracture zone, c = corrected value, x = replaced by more accurate value)

Column 3 = Feature name

Column 4 = Age of seafloor (Ma)

Column 5 = estimated +/- error range

Column 6 = Age of load (Ma)

Column 7 = estimated +/- error range

Column 8 = Elastic thickness, Te

Column 9 = estimated +/- error range

Column 10 = First author

Column 11 = Year of publication
