

## Concerning the .nb Format

Mathematica notebooks (.nb files) can be read (and printed) by those not owning the regular Mathematica providing the user has downloaded and installed the free Wolfram CDF Player from:

<http://www.wolfram.com/cdf-player/>

Otherwise regular .nb files can be run, modified, and saved as .pdf or as .nb files (If the copyright notice is left intact. See the “read me” for details.) by those having a regular, student, or home version of Mathematica available.
